Outgrid Labs

SALES PLAYBOOK · 1 OF 4

The six steps to the advance.

What to do at each step, and how you know it's done. Prices and customer types are on the Sales Sheet.

1 Chat

WHERE The same channel they came from. DM stays in DM, WhatsApp stays on WhatsApp.

DO Ask Q1 and Q2 from the Sales Sheet. Once you know what they want, share the price range from the price list.

Done when: you know their customer type, what they want, and they're fine with the price range.

2 Call

WHERE Phone or WhatsApp call.

FIND OUT **Running business:** how it works today, the biggest headache, volume (orders, bookings, team size), who decides, when they want it live.
New idea: what they've done so far, their capital, who their first users are.

END WITH Fix the Google Meet: day and time.

Done when: you can write the proposal and the Meet is booked.

3 Proposal

DO Start from the proposal template. Prices come from the price list. Give 3 plans where possible. If the scope is above ₹4L, split it into phases.

SEND Before the Meet as a preview, always with the Meet time already fixed. Never as a standalone attachment.

Done when: they have the proposal and the Meet is confirmed.

4 Google Meet

ORDER
1. Repeat back their need in their words
2. Show the demo app on screen
3. Walk through the proposal, page by page
4. Answer their questions
5. Ask which plan fits them

Done when: they've picked a plan, or you know exactly what's stopping them.

5 Close

IF YES Send the UPI link and agreement the same day, while you're still on the Meet if possible.

IF NOT YET Fix the next Meet date before you hang up. Follow up only with the serious ones.

Done when: the advance is paid, or the next Meet is booked.

6 Advance and kickoff

DO 40% by UPI link, then the agreement, then a kickoff call within 24 hours. After that, a progress update every week.

Done when: money is in the bank and the kickoff date is fixed.

When they're not a fit

सध्या हे आमच्यासाठी योग्य वाटत नाही, पण तुमचा business तयार झाला की नक्की msg करा.
This doesn't look like the right fit right now, but message us once your business is ready.

2 OF 4

ADVANCED
Everything in basic, plus small new features and priority support.

Always included: server setup and app store launch.
Client pays directly: server hosting, Google Play ($25

3 OF 4

Proof to show.

People ask for a demo or past examples before they trust you. These three answer it.

1 · Delivery demo app

Android APK: one app with a role switch (customer / rider), plus the admin panel on the web. Show it on the Google Meet, and install it on their phone if you meet in person.

> "This is a working delivery app we built. Your version will have your name, products and settings."

2 · European booking marketplace

Screenshots or a short screen recording of the dashboards. Don't name the client.

> "I built a multi-vendor booking platform for a company in Europe: vendors, bookings, payments, dashboards."

3 · Our own loyalty platform

Screenshots of the merchant dashboard and customer view.

> "We built and run our own loyalty platform. The points system in your app comes from it."

4 OF 4

What the agreement must cover.

One or two pages, sent the same day the client says yes.

1. **Scope**
   The chosen plan, what's included, and what's not included (copy from page 2).

2. **Payment**
   40% to start, 30% at the working demo, 30% at launch. Each milestone is defined, with payment due within 3 days of it.

3. **Timeline**
   Launch date, plus what the client must give and when: logo, products, accounts, feedback within 3 days.

4. **Changes**
   Anything new is priced in writing before work starts.

5. **Ownership**
   Code and apps transfer to the client on full payment. Store accounts, domain and data are in the client's name from day one.

6. **Support**
   30 days of free bug fixes after launch, then the monthly care plan if they choose it.

7. **Third-party fees**
   Hosting, store accounts, WhatsApp API, SMS and payment gateway fees are paid by the client.

Payment: UPI link to the account in your name for now. No GST is charged while you're not registered.
