Outgrid Labs

PROPOSAL · ONLINE KIRANA STORE

Your kirana store, online.

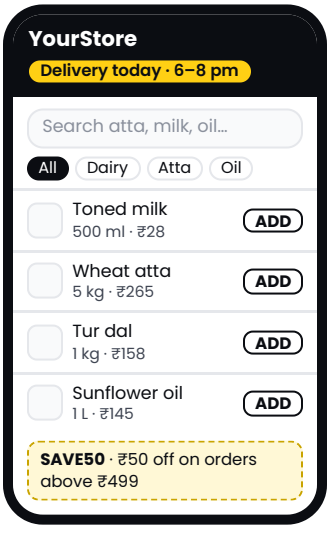

Customers order from their phone and pay online. You see every order in one place, and your delivery person knows exactly where to go.

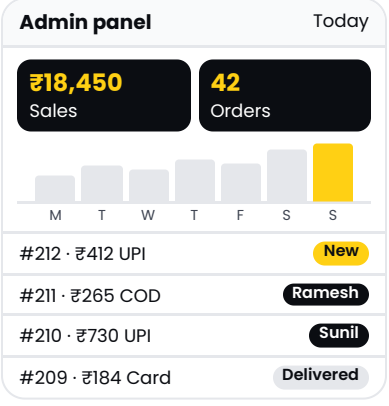

Date: _____

How it works

1. **Customer orders**
   Opens your website on their phone, searches, adds to cart, picks a delivery time, pays.
2. **You get the order**
   It shows up in your admin panel with every detail, and you get a notification.
3. **You assign it**
   Pick a delivery person. They see the order and address on their own login.
4. **Delivered**
   They mark it delivered. The customer gets a notification at each step.

What it looks like

Customer website and admin panel (sample data)

WHAT'S INSIDE

Three parts, one system.

Works on any phone or laptop. No app download needed.

Your customers — Website

- Search and product categories
- Product details: photo, size, price
- Cart and checkout
- Online payment by UPI or card, or cash on delivery
- Delivery time: pick a slot, or get it as soon as possible
- Coupons
- Notifications

You — Admin panel

- Every order with full details and status
- Who each order is assigned to
- Products, prices and stock
- Delivery slots and timings
- Coupons
- Statistics: sales and orders

Your delivery staff — Staff login

- Their own login on their phone
- Orders assigned to them, with address and phone number
- Mark an order delivered in one tap

Your products. Have a product list? We load it for you. No list yet? You add products from the admin panel, and we show you how.

PLANS

Pick your starting point.

Every plan includes setup and launch.

Launch

₹75,000

Everything to start taking orders online.

- Customer website: search, categories, product details, cart
- Online payment and cash on delivery
- Delivery slots or as-soon-as-possible
- Coupons and notifications
- Admin panel: orders, products, stock, assign delivery
- Delivery staff login
- Statistics: today's sales and orders

Growth

MOST POPULAR

₹1,15,000

For stores that want repeat customers and clear numbers.

Everything in Launch, plus

- Charts and reports: daily, weekly, monthly sales, top products, best customers
- Download reports to Excel
- Customer accounts: order history, saved addresses, one-tap reorder
- Offer banners and coupon rules: first order, minimum order, one use per customer
- Send offer notifications to all your customers
- Delivery areas, delivery charges and minimum order
- Low-stock alerts
- Staff roles: owner, manager, delivery

Growth + WhatsApp

₹1,50,000

For stores that already get orders on WhatsApp.

Everything in Growth, plus

- Orders typed on WhatsApp land in your admin panel as orders
- Auto-replies: welcome, store link, order confirmed
- Order updates sent on WhatsApp

TIMELINE AND PAYMENT

Live in 3 to 6 weeks.

3 weeks
Launch and Growth

6 weeks
Growth + WhatsApp

Week 1
Design in your store's look. Products loaded.

Week 2
Working demo of the website and admin panel. You try it.

Week 3
Your changes, payments switched on, launch.

Weeks 4–6
WhatsApp plan only: WhatsApp Business approval from Meta, setup, testing.

Payment: 40 · 30 · 30

Plan	To start	At demo	At launch
Launch	₹30,000	₹22,500	₹22,500
Growth	₹46,000	₹34,500	₹34,500
+ WhatsApp	₹60,000	₹45,000	₹45,000

Paid by you, directly to the provider: domain, server, payment gateway charges (about 2% per online payment), and WhatsApp charges on the WhatsApp plan. We set it all up and tell you the exact amounts before we start.

After launch: optional monthly care from ₹8,000/month. Hosting checks, fixes and small changes.

WHY US AND NEXT STEP

Why this is safe for you.

1. Fixed price in writing. Anything new is priced first.
2. A working demo before you pay the second part.
3. You own everything: website, data and accounts.
4. You talk to the person building it. No middlemen.

What we'll need from you

- Store name and logo
- Product list, if you have one
- Delivery area and timings
- Payment gateway account (Razorpay) in your business name
- A WhatsApp number for the business (WhatsApp plan)
- Feedback on the demo within 3 days

About us

Outgrid Labs

A Maharashtra studio building custom apps, websites and AI automation for businesses, end to end.

- Built a booking marketplace for a European company: vendors, catalogue, orders, payments, dashboards
- Built and run our own loyalty platform

Next: a 20-minute call.

We'll show you a live demo, answer every question, and help you pick the right plan. No commitment needed.
