Outgrid Labs

APP PROPOSAL

Your own quick-delivery app.

Your brand. Your customers. Your riders. Orders straight to your store, with no commission to anyone.

Customer app
Android + iPhone

Delivery app
For your riders

Admin panel
Run it all from one screen

Date: _____

01 · WHAT YOU GET

Three apps. One business.

Everything you need to take orders online and deliver them yourself, built for your store and owned by you.

3 apps
Customer, delivery and admin

2 platforms
Android and iPhone

Setup
Server and app store launch included

100%
Yours: code, apps, data

How an order flows

1. **Customer orders**
   Browses your products, adds to cart, pays by UPI, card or cash on delivery.

2. **You see it instantly**
   The order pops up on your admin panel. Your staff packs it.

3. **Rider picks it up**
   The delivery app alerts a rider, with the address and one-tap navigation.

4 **Delivered and recorded**

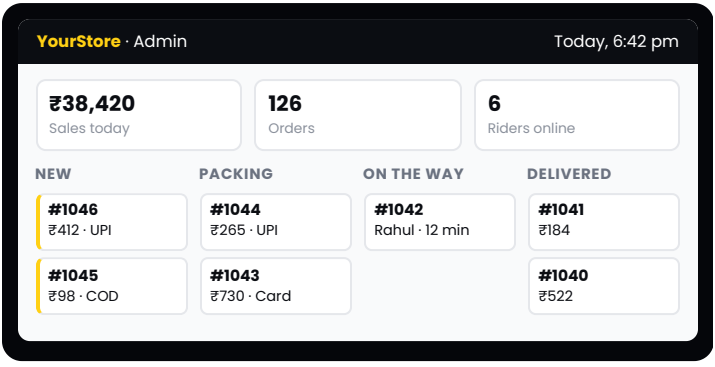

Customer shares an OTP, the order closes, and the sale lands in your reports.

You control delivery from the admin panel, any time:

- Instant delivery
- Time slots
- Delivery fee
- Minimum order
- Free delivery above ₹__
- Delivery area

> A realistic promise: Blinkit's 10 minutes runs on warehouses and riders on standby. With your store and riders, customers typically get fast local delivery in 20–40 minutes.

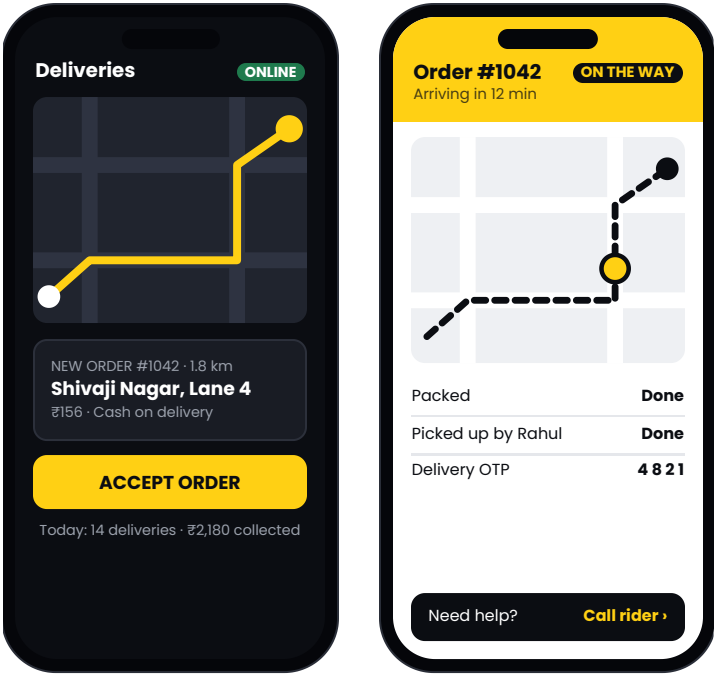

A peek at your admin panel

Admin panel: every order, live, on one screen (sample data)

02 · INSIDE THE APPS

Built for how your store works.

Delivery app for riders · live tracking for customers (Growth plan)

Customer app

Android + iPhone

- Login with mobile number (OTP)
- Saved addresses with map pin and delivery-area check
- Categories, offer banners and fast search
- Product sizes like 500 g and 1 kg
- Cart with minimum order and delivery fee shown upfront

- Coupons and offers
- UPI, card or cash on delivery
- Order tracking, history and one-tap reorder
- Ratings and notifications

Delivery app

Android

- Go online or offline
- New-order alerts with pickup and drop address
- One-tap navigation to the customer
- Delivery confirmed with customer OTP
- Cash collected recorded per order
- Today's deliveries and earnings

Admin panel

Web · laptop or phone

- Live order board: new → packing → on the way → delivered
- Products, categories and prices, with bulk upload from Excel
- Stock: quantities and in or out of stock
- Assign orders to riders
- Delivery settings: instant or slots, fee, minimum order, area
- Coupons and banners
- Customers and order history
- Reports: daily sales, cash collected, rider deliveries
- Staff logins with different access levels

03 · PLANS

Pick your starting point.

Launch

Live in 8–10 weeks

₹2,00,000

For stores starting online orders.

- Customer, delivery and admin apps
- You assign riders from the admin panel
- Customers get order status updates

MOST POPULAR

Growth

Live in 10–12 weeks

₹3,00,000

For stores that want repeat customers and less manual work.

Everything in Launch, plus:

- **Live rider tracking** on a map
- **Auto-assign** to the nearest free rider
- Wallet and instant refunds
- Loyalty points and referrals
- Push-notification offers to customers
- Low-stock alerts and detailed sales reports
- App in Marathi and English

Scale

Live in 14–16 weeks

₹4,50,000

For businesses with several stores in the city.

Everything in Growth, plus:

- Multiple stores, each order routed to the nearest
- Live link with your billing software for stock and prices
- Subscriptions for daily milk, bread and essentials
- WhatsApp order updates and ordering
- Delivery app on iPhone too
- Advanced business analytics

Fixed price once we agree the scope. No GST is charged. Timelines include a buffer and start once we begin.

03 · ADD-ON

Sell more than your own store.

Let the bakery, pharmacy and vegetable shop near you sell through your app. Your riders deliver, and you earn on every order.

OPTIONAL

Vendor module

+2 weeks

+ ₹75,000

Add it to Launch, Growth or Scale.

- Shops sign up as vendors; you approve each one
- Vendor panel: their products, prices, stock and orders
- Vendor marks an order ready; your rider picks it up
- You set each vendor's commission and see what you owe them

04 · HOW WE BUILD IT

Progress every week.

Growth plan timeline shown.

WEEK 1

Kickoff and screen designs

Your logo, colours and screens to approve.

WEEKS 2–5

Customer app and admin panel

Progress video on WhatsApp every week.

WEEK 6

Working demo MILESTONE

Place test orders on your phone; see them in your admin panel.

WEEKS 7–9

Delivery app, payments and the rest

Riders, online payments, offers and plan extras.

WEEKS 10–11

Testing with your team

Your staff and a few customers try it; we fix what they find.

WEEK 12

Live on Play Store and App Store LAUNCH

Handed over to you, in your name.

05 · PAYMENT

Pay as you see it work.

40% to start, 30% when you see a working demo, 30% at launch.

Plan	Start 40%	Demo 30%	Launch 30%
Launch	₹80,000	₹60,000	₹60,000
Growth	**₹1,20,000**	**₹90,000**	**₹90,000**
Scale	₹1,80,000	₹1,35,000	₹1,35,000
+ Vendor	₹30,000	₹22,500	₹22,500

After launch

- **30 days of free bug fixes**, included
- **Care plan, from ₹10,000/month** (optional): server care, fixes, small changes, store updates, monthly report. Stop any time.

Paid by you directly

Server hosting (a few thousand rupees a month at the start; we estimate it with you) · Google Play account $25 once · Apple developer account $99 a year · Razorpay fees on online payments (about 2%) · SMS for login OTPs · maps usage for live tracking (Growth and Scale)

06 · OUR PROMISES

Why this is safe for you.

- **Fixed price in writing.** Anything new is priced first.
- **Weekly progress video** and a live demo before every payment.
- **Launch date commitment.** Late because of us? 2 months of care free.
- **You own everything:** code, apps, accounts and data.
- **You talk to the person building it.** No sales middlemen.

What we'll need from you

- Logo, brand colours and app name
- Product names, prices and photos in our Excel sheet
- Google Play and Apple accounts in your name. **Start Apple on day 1**: its D-U-N-S check can take a few weeks.
- A Razorpay account in your business name
- Feedback on each demo within 3 days

07 · ABOUT US AND NEXT STEP

Outgrid Labs

A Maharashtra studio building custom apps, websites and AI automation for businesses, end to end.

- Built a **multi-vendor booking marketplace** for a European company: vendors, catalogue, orders, payments, dashboards
- Built and run our own **loyalty platform**, the engine behind your loyalty points

Next: a 20-minute call.

We'll show you a live demo, answer every question, and shape the plan around your store. No commitment needed.
