Proposal

Your own quick-delivery app.

A customer app, a delivery app and an admin panel, under your brand. Your customers order from their phone; you pack; your rider delivers. No commission to anyone, and you own all of it.

Prepared for: _____

Date: _____ · **Valid for 7 days**

Prepared by: Outgrid Labs · outgridlabs.com

1 · IN ONE MINUTE

What you get

- **Customer app** on Android and iPhone, with your name and logo.
- **Delivery app** for your riders (Android).
- **Admin panel** on any laptop or phone browser, to run everything.
- **Up to 1,000 products loaded for you.** We give you a simple Excel sheet; you fill names and prices; we upload it.
- **100% yours:** the code, the apps, the store accounts and your customer data.

How an order works

1. Customer opens your app, picks products and pays by UPI, card or cash on delivery.
2. The order appears instantly on your admin panel. Your staff packs it.
3. A rider gets the order on the delivery app, picks it up and heads out.
4. Customer gives the rider a delivery OTP. Done, and the sale shows in your reports.

You decide how delivery works, from the admin panel, any time: instant delivery or time slots, delivery fee, minimum order, free delivery above an amount, and delivery area.

Honest note: Blinkit's 10-minute delivery runs on dedicated warehouses and riders on standby. With one store and your own riders, plan for fast local delivery, usually 20–40 minutes depending on distance and riders.

2 · THE THREE APPS

Customer app Android + iPhone

- Login with mobile number (OTP)
- Save addresses with a map pin; app checks if you deliver there
- Home screen with categories, offer banners and search
- Product sizes and variants (500 g, 1 kg…)
- Cart with minimum order and delivery fee shown clearly
- Coupons and offers
- Pay by UPI, card or cash on delivery
- Order status updates and notifications
- Order history and one-tap reorder
- Ratings and feedback

Delivery app Android

- Go online / offline
- New order alert, with pickup and delivery address
- One-tap navigation to the customer
- Delivery confirmed with customer OTP
- Cash collected recorded per order
- Today's deliveries and earnings

Admin panel Web

- Live order board: new → packing → out for delivery → delivered
- Products, categories and prices; bulk upload by Excel
- Stock: quantity and in/out of stock
- Assign orders to riders
- Delivery settings: instant or slots, fee, minimum order, area
- Coupons and banners
- Customers and order history
- Reports: daily sales, cash collected, rider deliveries
- Staff logins with different access

3 · CHOOSE YOUR PLAN

Three plans. Start where it makes sense.

Launch

₹1,75,000

Live in 8–10 weeks

- Everything in section 2
- You assign riders from the admin panel
- Customer sees order status updates

Growth Recommended

₹2,50,000

Live in 10–12 weeks

Everything in Launch, plus:

- **Live rider tracking** on a map for the customer
- **Auto-assign** each order to the nearest free rider
- **Wallet and instant refunds**
- **Loyalty points and referrals**, so customers come back
- **Push notification offers** to all or selected customers
- Low-stock alerts and detailed sales reports
- App in **Marathi and English**

Scale

₹3,75,000

Live in 14–16 weeks

Everything in Growth, plus:

- **Multiple stores** in your city, each order routed to the nearest one
- **Live connection to your billing software** for stock and prices
- **Subscriptions** for daily items like milk and bread
- **WhatsApp** order updates and ordering
- Delivery app on iPhone too
- Advanced business analytics

Prices are final. No GST is charged. Timelines include a buffer, and count from the day we receive the advance and your product sheet.

4 · PAYMENT

Pay as you see progress.

40% to start
On signing. We begin within 3 working days.

30% at working demo
When you can place real test orders on your phone and see them in your admin panel.

30% at launch
When the apps are live on Play Store and App Store and handed over to you.

Amounts by plan

Launch · ₹1.75L

Start (40%) · ₹70,000

Demo (30%) · ₹52,500

Launch (30%) · ₹52,500

Growth · ₹2.5L

Start (40%) · ₹1,00,000

Demo (30%) · ₹75,000

Launch (30%) · ₹75,000

Scale · ₹3.75L

Start (40%) · ₹1,50,000

Demo (30%) · ₹1,12,500

Launch (30%) · ₹1,12,500

After launch

- **30 days of free bug fixes**, included.
- **Care plan (optional), from ₹10,000/month:** server management, fixes, small changes, app store updates and a monthly report. Stop any time.

Paid by you directly

- Server hosting (usually a few thousand rupees a month at the start; we'll set it up and estimate it with you)
- Google Play account: $25, one time
- Apple developer account: $99 a year
- Razorpay fees on online payments (about 2% per payment)
- SMS charges for login OTPs; maps usage for live tracking (Growth and Scale)

5 · OUR PROMISES

What makes this safe for you.

- **Fixed price in writing.** The number here is the number you pay. Anything new is priced before we do it.
- **Weekly progress video** on WhatsApp, and a live demo at every payment milestone.
- **Launch date commitment.** If we miss it because of us, your first 2 months of the care plan are free.
- **You own everything:** code, apps, store accounts, domain and data are in your name.
- **You talk to the person who builds it.** No sales middlemen.

What we need from you

- Your logo, brand colours and app name
- Product names, prices and photos in our Excel sheet (up to 1,000 products)
- Google Play and Apple developer accounts in your name. **Start the Apple account on day 1:** a company account needs a free D-U-N-S number, which can take one to a few weeks.
- Razorpay account (KYC in your business name)
- Feedback on each demo within 3 days

6 · ABOUT US

Outgrid Labs

A Maharashtra-based studio building custom apps, websites and AI automation for businesses, end to end.

- We built a **multi-vendor booking marketplace for a European company**: vendors, catalogue, orders, payments and dashboards, the same engine behind your app.
- We built and run our own **loyalty platform**, the loyalty points in your Growth plan come from this experience.

- One codebase for Android and iPhone, so you get both without paying twice.

Next step

1. Choose your plan.
2. Pay the 40% advance. You get the agreement and an invoice the same day.
3. Kickoff call within 24 hours. Your first screen designs arrive in week 1.
